

AMENDMENT

Kindly amend the claims as follows:

Sub B1
A
1. (amended) A method to prevent, treat, inhibit, or reduce restenosis or intimal hyperplasia in adjunct with angioplasty in a human subject, which method comprises locally administering an effective amount of one or more photosensitizer to a blood vessel site that has undergone angioplasty, and irradiating said site with radiation containing one or more wavelength(s) absorbed by said one or more photosensitizer for a time and at an intensity to prevent, treat, inhibit, or reduce restenosis or intimal hyperplasia at said site without depleting all endothelial and smooth muscle cells, wherein the concentration of said one or more photosensitizer, the intensity of the radiation, and the total energy provided are adjusted to provide said site with low dose photodynamic therapy.
